

CRYOCUT® 880 PLUS

HIGH PERFORMANCE OIL BASED EMULSION

Performance Delivery

CRYOCUT® 880 PLUS exceeds the needs of the Australian machine shop where one fluid is preferred and used on multiple applications, materials and machine types. CRYOCUT® 880 PLUS is formulated with proven, oil based technology synergising with high performance "new age" raw materials and additives improving cut-zone tool life and sump life

High performance Corrosion control - Protects high cost capital equipment, tooling, jigs/fixtures and machined components from corrosion

Operator friendly - raw materials and additives selected to minimise skin irritation whilst still delivering required cut zone performance

Foam is minimised with the use of high performance additive selected to target foam in high pressure, low water hardness applications

Cleanworking to the machining envelope even when cutting "Dusty and dirty" materials such as forgings washing residue deposits clean

Material Types

High performance lubrication on High Alloy Steels, Carbon Steels, Cast/Ductile Iron, Stainless Steels, Non staining compatibility to all Aluminiums including 6000 and 7000 series,

Physical / Chemical Detail

Refractometer Factor :	-	1.2
Colour :	-	Oil colour / Milky white in use
pH, 5.0% mix, typical operating :	-	9.4
Mineral Oil containing	-	Yes
