

CRYOCUT® SYN V PLUS

HIGH PERFORMANCE HYPER SYNTHETIC

Performance Delivery

CRYOCUT® SYN V-PLUS exceeds the needs of the Australian machine shop where one fluid is preferred and used on multiple applications, materials and machine types.

CRYOCUT® SYN V-PLUS is a true Multi material, completely clean running synthetic where non oil cleanliness meets high performance extreme pressure additives synergising "new age" raw materials and additives improving cut-zone tool life and sump life

High performance Corrosion control - Protects high cost capital equipment/high speed spindles and precision ground surfaces, tooling including back end tooling adapters, jigs/fixtures and the machined component from corrosion

Operator friendly - raw materials and additives selected to minimise skin irritation, low misting, low depletion rates whilst still delivering the required cut zone performance. Complete cut zone visibility in machine. Foam is minimised with the use of high performance additives selected to target foam in high pressure, low water hardness applications - nil foam even in zero hardness water

High performance Microbial/Bacterial Control package to extend sump life and all round cleanliness to deliver operator acceptance and hyper machine tool sump life. Completely clean running inhibiting all microbial growth

NOTE - FOR THE ABOVE PERFORMANCE THE FLUIDS CONCENTRATION NEEDS TO BE MAINTAINED @ 8% = 3% ONLY ON REFRACTOMETER

Material Types

High performance extended tool life lubrication on High Alloy Steels incl Bisalloys®, High Speed Steels, Stainless Steels, Non staining compatibility to all Aluminiums including ADC type/wrought Aluminium alloys, 2024, 6000 and 7000 series etc

Physical / Chemical Detail

Refractometer Factor :	-	2.6
Colour :	-	Oil colour / Clear - Transparent
pH, 5.0% mix, typical operating :	-	7.9 / 7.5
Mineral Oil containing	-	No

Ph: +61 7 3393 9369
